## **Abstract**

These are lecture notes to accompany my lectures as part of the first-year MPhil course in econometrics at Oxford. For more details, see the course website: [economictricks.com](https://economictricks.com). If you spot any typos, send me a [Github pull request](#) or an email: [francis.ditraglia@economics.ox.ac.uk](mailto:francis.ditraglia@economics.ox.ac.uk).

# Contents

<b>1</b>	<b>Maximum Likelihood</b>	<b>2</b>
<b>2</b>	<b>Models for Count Data</b>	<b>3</b>
<b>3</b>	<b>Binary Outcome Models</b>	<b>4</b>
<b>4</b>	<b>Random Utility Models</b>	<b>5</b>
<b>5</b>	<b>Sample Selection Models</b>	<b>6</b>

# Chapter 1

## Maximum Likelihood

## Chapter 2

# Models for Count Data

## Chapter 3

# Binary Outcome Models

## Chapter 4

# Random Utility Models

# Chapter 5

## Sample Selection Models
